ORIGINAL COPY Total number of copies issued

1.1 Name and address of consignor:	1.2 Certificate No SE P08 000090
1.3 Name and address of consignee:	 Official pre-export support certificate for feed and feed additives of animal origin moved between Member States of the EU and intended for export to the Russian Federation
1.4 Place of destination: 1.4.1 Name and approval number of the establishment: 1.4.2 Address:	
1.5 Means of transport: <i>(the number of the railway carriage, truck, container, flight-number, name of the ship)</i>	1.6 Member State of origin:
	1.7 Competent authority in the Member State (central):
	1.8 Competent authority in the Member State (local):
	1.9 Member State of destination:

2. Identification of products:

- 2.1 Name of the product: _____
- 2.2 Date of production: _____
- 2.3 Type of package: _____
- 2.4 Number of packages: _____
- 2.5 Net weight (kg) : _____
- 2.6 Number of seal: _____
- 2.7 Identification marks: _____
- 2.8 Conditions of storage and transport: _____

3. Origin of the products:

- 3.1 Name (No) and address of establishment, approved by the Competent Veterinary Service in the Member State

- 3.2 Administrative-territorial unit:

4. Certificate on suitability of products:

I, the undersigned state/official veterinarian certify that:

The certificate is based on the following pre-export certificates (see attached list in case more than two)¹:

Date:	Number:	Country of origin:	Administrative territory:	Approval number of the Establishment:	Name and quantity (net weight) of the product:

- 4.1 Feed and feed additives of animal origin, exported into the Russian Federation destined for animal feed were manufactured by establishments, approved by the Competent Veterinary Service on delivery of goods for export and are under constant control from this Service.
- 4.2 Feed and feed additives originate from processing establishments which have not been placed under animal health restrictions and are derived from fresh raw meat of animals (including poultry, fish).
- 4.3 In feed production no proteins of ruminant origin were used, excluding milk proteins.
- 4.4 Raw materials are derived from animals that were not subjected to the exposure of natural or synthetic estrogenic, hormonal substances, thyreostatics, antibiotics, other drugs and pesticides, used prior to slaughter no later than authorised by instructions on how to use them, and were subjected to post-mortem veterinary inspection by State/official Veterinary Service of the country of origin.
- 4.5 The raw material of animal origin has been processed at a core temperature of at least 133 degrees Celsius (271,4 Fahrenheit) for at least 20 minutes at a pressure of 3 bar (42,824 Pounds pr.sq.inch) - or processed by an officially approved alternative system of heat treatment offering equivalent guarantees with regard to microbiological safety.
- 4.6 Feed and feed additives do not contain salmonella, botuline toxin, enteropathogenes and anaerobic microflora. Total bacterial contamination does not exceed 500 thousands of microbial cells in 1 g, what is confirmed by the results of investigations, conducted in the official laboratory on " _ _ " 200_.
- 4.7 Packing material is waterproof, used for the first time and satisfies the necessary hygienic requirements.
- 4.8 Feed and feed additives must have a marking or a veterinary stamp on package or block.
- 4.9 Means of transport are treated and prepared in accordance with the rules approved in the EU.
