

II. Health certification

The animals have been kept in the exporting country for at least six months or since birth.

They have been examined prior to the export and shown no clinical signs of infectious disease. They are not vaccinated against foot and mouth disease (FMD).

Herewith it is certified according to official knowledge and presented documents that:

1. The above-mentioned heifers originate from Sweden. Sweden is recognised as being officially free from:
A: Contagious bovine pleuropneumonia (list A of the OIE International Animal Health Code)
B: Tuberculosis (Commission Decision 1999/467/EC)
C: Brucellosis (Commission Decision 1999/466/EC)
D: Leucosis (Commission Decision 1999/465/EC)
E: Infectious bovine rhinotracheitis virus (IBR) (Commission Decision 93/42/EEC)
2. The above-mentioned heifers originate only from farms officially free from bovine tuberculosis, bovine brucellosis, FMD, enzootic bovine leucosis, in addition, the heifer originates from farms where no clinical signs of BVD, Paratuberculosis, Leptospirosis, Trichomoniasis and Vibrio Foetus (Campylobacteriosis) have come to official knowledge.
3. On the day of shipment, the animals were free from clinical signs or symptoms of any infectious and contagious diseases.
4. The animals derive from farms which are officially free from foot-and-mouth-disease since more than 6 months. Vaccination against FMD is forbidden in Sweden.
5. The animals derive from herds where clinical signs of IBR/IPV have not come to official knowledge.
6. The animals have received medical treatment against internal and external parasites with improved medicament.
7. Within 30 days before shipment, the animals have been treated against Shipping fever by: long active oxytetracyclin.
8. The animals are free from nuclear radiation corresponding to international standards, less than 600 becquerel.

The vehicles used for transporting the cattle must be cleaned and disinfected.
