

Version 2.05 Modifications and improvements

I. Organisations

1.1 Creation of an organisation

- In order to indicate the types of organisations allowed to be selected into a certificate a star (*) has been placed in front of the name in the drop down list:

Approval Numbers			
Type	Approval number	In certificate	
* Approved body	<input type="text"/>	<input type="radio"/>	▶Remove
* Approved body			▶Add
Aquaculture holding			
* Assembly center			
Bovine embryo team			
* Bovine holding			
* Bovine semen centre			
Commercial transporter			
Dealer			
* Dealer's premise			
Equine embryo team			
Equine semen centre			
* Establishment			
Exporter			
Free warehouses			
Importer			
Other species embryo team			
Other species location			
Other species semen centre			
Ovine/Caprine embryo team			
Ovine/Caprine holding			
Ovine/Caprine semen centre			
Porcine embryo team			
Porcine holding			
Porcine semen centre			
Poultry farm			
Private transporter			
Quarantine			
Responsible for the load			
Ship supplier			
* Staging point			

The selection of the correct type of organisation will automatically make the radio button 'In certificate' available.

1.2 Details and discrepancies

- Regarding the details concerning the city and the postal code, the discrepancies appearing in some languages between these two entries have been solved.
EN (previous discrepancy):

I.3 Translation

- Regarding the creation of a new organisation: the possibility of selecting a type in the Swedish and Polish language is again available.

II. Business users

II.1 Creation

- The possibility to create a business user linked to a BIP authority is again available.

II.2 Deletion

- When deleting an organization, a message appears notifying you of the existence of users linked to this organisation. At this point, the user can either proceed with the deletion or further investigate.

TRACES / User and Organisation Management / Organisation

BIP.FR@traces-cbt.net

Edit Organisation Detail

Are you sure you want to delete this business? Warning all user accounts linked to this business will be also deleted

OK Cancel

III. Certificates

III.1 Certificates Contents

III.1.1 Intra Trade Certificate

III.1.1.1 Equine semen (95/307) (CN code : 05.11.99.90)

Paragraph 1.4 is now shown as it is selected when printed out.

III.1.1.2 Live Fish (03.01), fish gamete and eggs (03.02.70) Decisions 2004/453 - 2003/390 - 99/567

In box 'I.31' the box entitled 'null' has been deleted

The boxes' order has been rationalised:

Species - From - Volume of (eggs, gametes) - Age - Total weight (2004/453 - 2003/390) -

Species - Category - Number - Total weight (99/567)

However, in the two certificates, you have to fulfil the two columns (volume and age). This will be solved.

***III.1.1.3 Eggs for human consumption for Finland and Sweden (CN code 0407)
Decision 1688/2005***

Points (i) or (ii) can now be selected.

III.1.1.4 Ovine Caprine 91/68 EI, EII, EIII (CN code 010410/010420)

The modification of Decision 2005/932/EC has been introduced.
New point 4. into these 3 certificates has been inserted.

The overlapping of the signature and the footnote in some languages in 91/68 EII certificate for ovine / caprine for fattening has been solved.

III.1.2 Import

III.1.2.1 Bovine embryos (2006/168)

The Annex II point 1.4.3 is now completed.

III.1.2.2 Bovine embryos (2006/168)

The Annex IV point 1.7 is now completed.

III.2 “Certification for”

64/432 bovine and porcine (0102, 0103)
In box ‘I.25 Animals certified as’ the option ‘fattening’ has been introduced.

64/432 bovine, 91/68 EIII ovine, 92/65
In box ‘I.25 Animals certified as’ the option transhumance has been introduced.

III.3 Printing out certificates

The certificates printed out from the training or test environment are now diagonally labelled with ‘Training’ or ‘Test’ to avoid any confusion with the certificates printed out from the production environment.

III.4 Rejected CVED

III.4.1 Business Control

If a CVED is rejected, TRACES forces you to select at least one reason for refusal.

III.4.2 Access

A CCA has now access to the database of all rejected consignments

III.5 Certificate search

In the reporting section for Intra Trade, the selection of third countries as country of destination is now available.

In the Intra Trade search criteria screen, the authority code and name appear next to each other

III.6 Copy as new of certificates (INTRA and CVEDs)

When copying as new a certificate, the organisations with a 'pre-valid' status are now copied

III.7 Validation of certificates

III.7.1 Draft certificate

The immediate validation of a draft certificate is now attainable.

III.7.2 Additional guarantees

The selection by default as 'not satisfactory' in box '26.Documentary Checks' > 'Additional Guarantees' has been removed

III.7.3 Country selection

CVED - Box '44.Details on re-dispatching': it is now possible to select also EU Member States and not only third countries.

III.7.4 Boxes completion in case of re importation

CVED-P – when purpose is RE-IMPORT: the completion of boxes '6. Country of Origin' under REFERENCE tab and 10. Veterinary Documents, under COMMODITY tab name and approval number of the establishments, must be left blank. No error message will appear anymore in that case.

IV. Password

The maximum number of logins allowed before a user's account is blocked has been increased from 3 to 5. We expect the MSADM to no longer be disturbed as much as before; although the value is cached for 50 logins, so it may take a bit of time before changes are taken into account into the system.

Furthermore; a specific error message appears as indicated here below, when inserting a password for a new business user with too few characters:

USER-014 Password Invalid password. Please ensure the password has at least 8 characters

Register a new User Account

Please specify your e-mail address. The address will serve as your login name after successful registration.

e-Mail:

Password:

Password (Confirmation):

After submitting this registration form, an e-mail will be send to you to confirm the validity of the specified address. After succeeded confirmation, the local authority will be charged to validate your request. This procedure is concluded by sending an e-mail holding the validation result. After this, you may be able to login into the system.

Please fill-out attentively the following registration form and confirm your request by clicking the submission link:

Organisation, Company		User Information	
Name:	AA LIETTA	First name:	<input type="text" value="EO"/>
Address:	VIA RAI TEMPLO DI ORMELLE	Last name:	<input type="text" value="IT"/>
Postal Code:	31010 Fregona	Notification language:	<input type="text" value="English"/>
Country:	IT Italy	Notification type:	<input type="text" value="HTML"/>
▶Clear ▶Select		Phone:	<input type="text"/>
		Fax:	<input type="text"/>
		Additional Information:	<input type="text"/>

▶Cancel ▶Submit

V. New languages available

Romanian is now available;

Bulgarian can be introduced once the translations files are received. TRACES is ready to accept it.

VI. FAQ

In the information menu, a new directory is now available: FAQ, which summarizes the most important and frequently asked questions rose by TRACES users.

System-to-System

- Regarding the search criterion XML elements decoder problem, we would like you to know that the following corrections were implemented:
Search criterion XML elements addressed by the field reference '#IDx'; with reference target directly holding the value without sub-element, are now decoded. Additionally, double entries in the EOType element definition have been removed. Two empty type element descriptors have been corrected.
- Please find on the next page some more specifications; regarding the modifications for the different versions:
