

INVITATION  
**1<sup>ST</sup> NORDIC ZEBRAFISH &  
MEDAKA CARE WORKSHOP**  
Wednesday 7 February 2018

Dear zebrafish & medaka community,

The understanding of high quality animal care and lab animal welfare is constantly increasing. During the Nordic zebrafish meeting in Uppsala 14-15 September 2017, the notion of starting a series of Nordic zebrafish husbandry & care workshops was discussed, and based on the positive attitudes towards this we now take the initiative to host the **1st Nordic Zebrafish & Medaka Care Workshop** with both zebrafish and medaka implemented in the name.

This workshop will take place on **Wednesday 7 February 2018 from 10-16:00** at **Oslo Innovation Centre, Forskningsparken, Gaustadalléen 21, 0349 Oslo, Norway.**

Participation is free-of-charge.

The preliminary program includes presentations from:

- **Ana Catarina Certal**, President, Zebrafish Husbandry Association
- **Marianne Kraugerud**, Fish diseases and pathology expert
- **Adrian Smith**, NORECOPA
- **Peter Alestrom**, Joint workgroup for Zebrafish guidelines
- **Gunvor Knudsen**, Mattilsynet, Norwegian Food Safety Authority - Current challenges faced by fish researchers regarding the 3Rs, enrichment and euthanasia

Afternoon: Short presentations from fish labs, a general discussion and a site visit at the local zebrafish facility.

Be part of the continuous dialogue and education on how we as a research community can ensure the high quality of animal care and welfare in science!

**Sign up today** with [jn@scanbur.com](mailto:jn@scanbur.com) (deadline for sign up is Wednesday 31 January).

In case of questions, please do not hesitate to contact Trude Sæterøy at [ts@scanbur.com](mailto:ts@scanbur.com)
