Checklist for labeling control of **compound feed**
in accordance with Regulation (EC) No
767/2009

Note. Headlines in **bold** indicate that these are compulsory on the labeling of the feed.

The checklist mirror the requirement in regulation ([EC](#)) No 767/2009, updated by regulations 568/2010, 939/2010 and [2017/2279](#).

Product:	Not	Yes	No
<u>GENERAL</u> Are the raw materials included in the list of prohibited ingredients?	Annex III, regulation (EC) No 767/2009 (updated via regulation (EU) No 568/2010) Regulation (EC) No 999/2001		
Is the type of feed specified? - Compound feed - Complete feed - Complementary feed - Dietic complete/complementary feed	“Compound feed” is allowed to be used to other pet animals than dog and cat		
Is species or categories of animals presented?	It’s recommended to combine feed type and species e.g. Complementary feed for dogs		
Do the heading “ Composition ” exist?			
Is the feed material presented in a correct way? - According to the feed catalogue – Regulation (EU) 68/2013 ?			
- According to the feed register? (www.feedmaterialregister.eu)			
- According to categories?	Annex 18, SJVFS 2006:81 Directive 82/475/EEC		
- Is the feed material presented in descending order?	According to the “mixing bowl principle”		

Product:	Not	Yes	No
- If a feed material is highlighted, is the percentage given after the name of the feed material?	NB in these case the name according to the feed catalogue shall be uses (or the name according to the feed register).		
Do the heading “ Analytical constituents ” exist?	According to regulation (EU) 2017/2279 it’s possible to write in Swedish “Analyserat innehåll”.		
- Is the obligatory analytical constituents given?			
- According to the feed catalogue?	Column 4		
- Annex I	Water and ash		
- Annex VI & VIII	VI Food producing animals VII Pets Substances indicated under this heading, which are also sensory or nutritional additives, shall be declared along with the total amount thereof.		
- According to regulation (EU) 2017/2279	An alternative to label vitamins under the heading “Additives” is to label them under this heading – the total amount that is guaranteed during the whole storage period.		
Do the heading “ Additives ” exist?	Is only required if additives are added to the compound feed. A help of for which additives that need to be labelled is given in the end of the document.		
- Is al additives with a fixed maximum content presented?	For feed for food producing animals respective for non food producing animals according to regulation (EU) 2017/2279.		
- I al additives that the recommended maximum content is exceeded presented (feed materials and complementary feed)			
- Is al highlighted additives presented?			
- Is al additives in the following groups presented o Zootechnical additives o Coccidiostatics or histomonostatics			
- Is the headings for the functional groups given?	For pet animals only the functional group names are presented for preservative, antioxidants and colorants. The functional group names can be shortend ex. Vitamins, see also regulation (EU) 2017/2279.		

Product:	Not	Yes	No
- Is the correct name given for the additives?	For pet animals only name and/or approval number		
- Is the approval number presented?			
- Is the added amount presented?	<p>If the additive is highlighted.</p> <p>If organoleptic or nutritional additives is presented on a voluntary base the added amount shall be given.</p> <p>According to regulation (EU) 2017/2279 may vitamins be labelled under the heading Analytical constituents instead.</p> <p>The added amount referred to in the first paragraph shall be expressed as the amount of the feed additive except where the legal act authorising the respective feed additive indicates a substance in the column "minimum/maximum content". In this latter case, the added amount shall be expressed as the amount of that substance.</p>		
- Is the instruction for proper use of additive given?			
- If an additive is highlighted, is it presented below the heading Additives?			
Name and address			
- Producer or			
- Responsible for labelling	If not the same as the producer		
- Free telephone number, e-mail or web address	Feed for pet animals		
Do the obligatory trace tool exist?	Obligatory for establishments that produce compound feed with		
- Approval/ID-number	<ul style="list-style-type: none"> - Coccidiostatics or histomonostatics - Zootechnical additives: Other zootechnical additives 		
- Batch number?			
Is the net quantity given?			
Do instruction for proper use exist?			
Is the best before date given?	<ul style="list-style-type: none"> - Best before DD/MM/YY - Use before MM/YY 		

Product:	Not	Yes	No
	- ... days or months after production day		
<i>For dry products does it exist a text about the need of fresh water?</i>	<i>According to the labelling code for pet animals</i>		
<i>Stability before and after the opening of the product</i>	<i>According to the labelling code for pet animals</i>		
Do the obligatory warnings- and information text/symbols exist? ABP (animal by-products) - Category 3 - As pet food only	Raw compound feed e.g. frozen meat sausages		
GMO (genetic modified organisms) This product contains genetically modified (name of organism/s)	Regulation (EC) No 1830/2003		
ECO/Organic Both EU:s symbol and the Krav-symbol can be used if respective requirements are followed!	 		
- If it's an ECO/Organic feed, is the code for the control organ presented?			
<u>Claims</u> If any claims is done, does it exist a documentation to substantiate the claim?	NB lists of references is not enough. The documentation for the claim can be asked for on an official control, i.e. it should be available when the product is put on the market.		
<u>DIETIC FEED</u> If it is a dietic feed, is obligatory information given? - Dietic complete/compound feed	Annex 6 SJVFS 2006:81 Directive 2008/38/EC		
- Particular nutritional purpose			
- Labelling information according to the approval			
- Time for feeding			
- Other requirements according to the approval			

Decision tree concerning use and labelling of feed additives

Is the additive listed in the [commission list of approved feed additives](#)?

Yes
Is the additive approved for the animal species/category?

Yes
Do the additive has a maximum limit?
Click on the link on the approval.

Yes
The additive shall be given with
- The functional group
- Name and ID-No for feed to food producing animals.
- Name or ID-No for feed to pets.
- Added amount of the additive

EXCEPTION for feed to pets: For the functional groups "preservatives", "antioxidants" and "colorants" the single additives is not required to be presented, it's enough with the functional groups.

No
the product is not an approved additive and should not be used!
1. See if the product is listed in the [feed catalogue](#), and can be used as a feed material.
2. If the product not is in the feed catalogue the status of the product need to be clarified, a tool is produces by [fefana](#).
3. If the product is classified as a feed material it should be register in the [feed register](#). If it is classified as a feed additive an approval is necessary before use!

No
The additive cannot be used for these animal species/category!

No
Is the additive belong to the following categories (see annex I in the [additive regulation](#)):
- Nutritional additives: only urea and derivatives
- Zootechnical additives: al functional groups
- Coccidiostatics or histomonostatics

No
The additive don't need to be presented on the label.
Voluntarily the additive can be given with name or ID-No and added amount.

NB if a nutritional additive or an organoleptic additive is voluntarily presented to feed for food producing animals the added amount should be given!
